Is this email Safe or Malicious?	My Analysis
Safe	<ul> <li>The content of the email is mainly a casual conversation about a movie trailer.</li> <li>There are no suspicious files, images, or clickable URLs in</li> </ul>
	<ul> <li>the email.</li> <li>The email primarily consists of a relaxed discussion regarding a film preview.</li> </ul>
	<ul> <li>The email predominantly revolves around a friendly exchange about a trailer, indicating its safety.</li> <li>These observations strongly imply that the email is not harmful.</li> </ul>

## Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul> <li>The sender of the email asks the user to click on the link to update their account, claiming it is for a document.</li> <li>The sender attempts to make the email appear professional, but Microsoft does not send emails for a single document that does not fit in Dropbox.</li> <li>The URL used may be a phishing technique aimed at stealing user data.</li> <li>These messages are fraudulent and designed to manipulate recipients into taking quick action by creating a false sense of urgency.</li> </ul>

## Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul> <li>The link has a ".opt" extension after .com, which is not commonly used and seems suspicious.</li> </ul>
	<ul> <li>The "b" in "Facebook" is formatted differently in the URL compared to the rest of the sentence.</li> </ul>
	<ul> <li>This is a clear attempt of phishing to steal the credentials.</li> </ul>
	<ul> <li>Do not respond to such emails and only use authenticated social media websites.</li> </ul>

Is this email Safe or Malicious?	My Analysis
Safe	The email is from Adam Markus and it includes information
	about a product being advertised.
	<ul> <li>The email contains promotional content for a product.</li> </ul>
	<ul> <li>Overall, The email is considered to be safe.</li> </ul>

## Email 5:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul> <li>Firstly, the sender is attempting to impersonate a government undercover agent, which is highly unusual.</li> <li>Government spies do not disclose their identity to ordinary individuals.</li> </ul>
	<ul> <li>The email requests the user's account details without providing a valid reason, raising concerns about its malicious intent.</li> </ul>
	<ul> <li>These factors strongly indicate that the email is malicious and should be treated with caution.</li> </ul>

## Email 6:

Is this email Safe or Malicious?	My Analysis
Safe	<ul> <li>The email has a maintained formal structure.</li> <li>The email has professional writing and tone.</li> <li>The email signature contains the name and designation of an ANZ employee. The ANZ name is capitalized and matches the official company logo.</li> <li>The email does not contain any suspicious or unusual requests.</li> <li>The email does not ask for personal or sensitive information.</li> <li>Overall, The email does not have any unusual things.</li> </ul>

Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul> <li>The email has not a maintained formal structure.</li> <li>The link started with "hxxp" which looks very suspicious.</li> <li>The link has a php extension instead of ".com or .in" which suggests it is part of an unknown web portal.</li> <li>Overall, These above factors strongly indicate that email is malicious and the sender try to phish the reciever.</li> </ul>
